Safe management of hypoglycaemia

Overview: This e-learning module looks at the knowledge needed to ensure you can effectively manage hypoglycaemia.

Learning objectives: On completion of all aspects of this programme you should be able to:

* describe the risk factors of hypoglycaemia
* recognise the signs and symptoms for hypoglycaemia
* safely and effectively treat hypoglycaemia
* prevent hypoglycaemia recurrence and know when to seek further advice
* have an understanding of the impact of hypoglycaemia on the individual
* access guidelines and appropriate patient literature.
