

Primary care learning for non-pathway pharmacy professionals

Version 4 – November 2023

The Centre for Postgraduate Pharmacy Education (CPPE) is commissioned to deliver the national *Primary care pharmacy education pathway* (PCPEP), and the previous *Clinical pharmacists in general practice education pathway* and *Medicines optimisation in care homes pathway*. These unique 15 and 18-month training pathways support pharmacy professionals to develop the confidence and competence to work in primary care.

This document highlights the CPPE learning opportunities available to all pharmacy professionals in primary care who are not eligible for one of the extended training pathways.

Contents

[Section 1 – Online learning: independent learning \(including information about care homes and COVID-19\)](#)

[Section 2 – Online learning: learning with others](#)

[Section 3 – Leadership and management training](#)

[Section 4 – Primary care key resources and documents](#)

[Section 5 – Care homes key documents](#)

[Section 6 – Care homes websites](#)

[Section 7 – Primary care structured medication review \(SMR\) tools](#)

For those enrolled or enrolling on the *Primary care pharmacy education pathway* (PCPEP): If you are employed in a primary care network through the additional role reimbursement scheme, the *Primary care pharmacy education pathway* is mandatory (unless you are [exempt](#)).

Those who are eligible and waiting for enrolment to open for the next cohort can start to work through some of the pathway learning. This is available online for all pharmacy professionals, as outlined in this document. If you complete some of the learning before your cohort starts, you will not need to repeat it.

Primary care learning for non-pathway pharmacy professionals

Version 4 – November 2023

Section 1 – Online learning: independent learning

Learning	Part of PCPEP	Help to upskill to undertake SMR
<p>Introduction to working in primary care For an introduction to working in primary care and how pharmacy professionals can work as part of the multidisciplinary health and social care team, you now have access to the Primary care essentials ten-unit e-course and associated assessment.</p>	Yes – Module 1 – you can work through these resources before starting the pathway. If the course is not completed before starting the pathway, it can be rejoined once enrolled.	Yes – this course will help you to understand more about working as part of the multidisciplinary and wider healthcare team.
<p>Preparing to work in a primary care network or GP practice e-course</p>	No - <i>Preparing to work in a primary care network or GP practice</i> e-course introduces you to the concepts of PCNs and ICSs, helping you to understand their origins and purpose in healthcare today.	
<p>Structured medication review (SMR) The Structured medication review e-course will develop your clinical knowledge and confidence to perform SMRs.</p>	Not available to CPGP, MOCH or PCPEP Integrated throughout the pathway so please do not sign up for this if you are enrolled or soon to enrol on PCPEP.	Yes – this learning will help you to develop clinical knowledge and skills to undertake SMRs.
<p>Care homes online learning There is a wealth of resources on our Care homes learning gateway, including our Care homes: supporting people, optimising medicines e-learning and the associated assessment.</p> <p>COVID-19 – CPPE has developed a COVID-19 learning gateway and learning and resource hub, which has useful resources for those working in primary care and care homes.</p>	Yes – Module 1 – you can work through these programmes and assessments before you start the pathway. Other care homes learning is integrated throughout the pathway.	Yes – this learning provides advice on opportunities to optimise medicines for care homes residents, which is part of Enhancing Health in Care Homes (EHCH) .
<p>Mental health e-course The Mental health e-course will equip you with the knowledge and skills to support people with mental health problems who you encounter in your practice. Completing this course will help you to feel more confident in providing advice to people with mental health problems, and to deliver a high-quality service.</p>	Yes – mental health is covered in Module 2 and Module 5 – but the e-course builds on pathway learning so it is relevant for those who want to learn more after completing the pathway.	Yes – this learning will help you to develop clinical knowledge to undertake SMRs in people with mental health problems.

Learning	Part of PCPEP	Help to upskill to undertake SMR
<p>Supporting others When working in primary care, you may identify staff training needs. To support pharmacy professionals to develop others, we have created an e-course titled Helping others learn.</p> <p><u>Preparing to train as an independent prescriber programme</u> The <i>Preparing to train as an independent prescriber</i> programme went fully live in October. This is a fully funded course and is made up of four main components, including a self-directed e-course, a mandatory online workshop, and an optional online workshop and peer support sessions.</p>	<p>Yes – Module 5.</p> <p>No learners undertake independent prescribing at the end of PCPEP.</p>	<p>Yes – this learning can be used to develop your skills to train others to participate in the SMR process.</p>
<p>Clinical learning – 1 We have a wide range of clinical topics covered on our clinical learning gateway pages, such as anticoagulation, diabetes, respiratory, sepsis and palliative care. These can be accessed from the CPPE homepage under the Clinical pharmacy tab.</p> <p>The following distance-learning packages provide comprehensive learning on broader topics:</p> <ul style="list-style-type: none"> • Older people • Learning disabilities • Fundamentals of respiratory therapeutics • Fundamentals of cardiovascular therapeutics e-course • Substance use and misuse <p>CPPE Optimise programmes (designed for secondary care) cover topics that would also be useful for pharmacy professionals working in primary care and care homes. Available topics are:</p> <ul style="list-style-type: none"> • Medicines reconciliation • Sepsis 	<p>Much of this learning is integrated into the pathway. There is no need to complete this before you start.</p>	<p>Yes – this learning will help you to develop clinical knowledge to undertake effective SMRs.</p>

<p>Clinical learning – 2</p>		
<p>We have also developed a range of clinical learning for the primary care pathways and primary care environment. These are in the form of factsheets for clinical conditions commonly seen in the care home environment. The factsheets are available here and listed below.</p>	<p>Module 2 – these factsheets are all part of Module 2, but you can look at them beforehand.</p>	<p>Yes – this resource will help to develop clinical knowledge to undertake effective SMRs.</p>
<ul style="list-style-type: none"> • <u>Acute kidney injury</u> • <u>Anaemia</u> • <u>Anxiety disorders and depression in older people</u> • <u>Aphasia</u> • <u>Asthma in adults</u> • <u>Atrial fibrillation</u> • <u>Bipolar disorder</u> • <u>Cancer</u> • <u>Chronic kidney disease</u> • <u>Chronic obstructive pulmonary disease (COPD)</u> • <u>Constipation</u> • <u>Coronary heart disease</u> • <u>Dementia</u> • <u>Dyspepsia</u> • <u>Dysphagia</u> • <u>End of life care</u> 	<ul style="list-style-type: none"> • <u>Healthcare-associated infections</u> • <u>Heart failure</u> • <u>Hypertension</u> • <u>Learning disabilities</u> • <u>Osteoporosis</u> • <u>Pain</u> • <u>Parkinson's disease</u> • <u>Pneumonia</u> • <u>Pulmonary embolism</u> • <u>Sepsis</u> • <u>Stroke</u> • <u>Thyroid dysfunction</u> • <u>Type 2 diabetes</u> • <u>Urinary tract infection in adults</u> • <u>Wound management</u>

Section 2 – Online learning: learning with others

Learning	Part of PCPEP	Help to upskill to undertake SMR
<p>Shared decision making Shared decision making and personalised care are core elements of the NHS Long Term Plan. Shared decision making is linked to improved outcomes for patients and puts patients at the centre of their own care, making them experts in their own healthcare decisions. The programme is delivered online and consists of an e-course, which must be completed prior to booking and attending two full-day online workshops.</p>	<p>Yes – Module 5 – but you could work through this learning before you start the pathway.</p>	<p>Yes – this programme will help you to develop and enhance your skills so that shared decision making is embedded in your SMRs. Please see the new NICE guidance on shared decision making. The CPPE programme builds on the short National Institute for Health and Care Excellence (NICE) online learning package.</p>
<p>Online workshops We have the following online workshops that support learning for those working in primary care. Please check the CPPE website for current availability:</p> <ul style="list-style-type: none"> • Emergency contraception • Deprescribing • The Mental Capacity Act 2005 and covert administration of medicine • Falls prevention • Medicines optimisation in care homes essential skills • Medicines reconciliation in transfer of care Optimise programme • Deprescribing opioids in people with chronic pain • Supporting patients living with dementia • Mental health and wellbeing in primary care 	<p>Medicines optimisation in care homes essential skills is integral to the pathway.</p> <p>Neurology and dementia in primary care and Mental health and wellbeing in primary care are part of Module 5.</p>	<p>Please explore the CPPE website for further details on these online workshops.</p>
